Interview Agenda

This is to confirm that we have scheduled a telephonic interview for Wednesday, May 12, 2004, at 2:00 P.M. (ET) to discuss Application No. 09/523,313. As agreed upon, I have prepared the following proposed agenda.

In our discussion, I intend to discuss how the features of Czerwinski are different from those of the present invention, particularly with regard to the features of control over display means to display representations for the sets of data by physically separating the sets of data in accordance with similarity values, and to display links between the representations in accordance with the similarity values, which Czerwinski does not do.

Incidentally, an Information Disclosure Statement will be filed today citing art cited in a Search Report for a counterpart European Application.
